

# BH220

## 19" Universal Rack

### Overview

A rack-mount system that can be used to combine Video Distribution Amplifiers, Line Correctors and Hum Cancellers in one enclosure. The BH220 is ordered unpopulated with 16 slots available and then assembled with modules as per the customer's requirement. The versatile design enables a choice appropriate to the installation and also offers

the potential to reserve space for future capacity. Depending on the configuration, the unit will accept a maximum of 32 cameras. The rack is supplied with in line switch mode power supply, extender card to assist the installer with any required adjustments and is fully RoHS compliant.
